Nutkao

Axians Sirecom for Nutkao

Axians Sirecom

Nutkao, one of the biggest producers of spreads in the world, asked Anixter Sirecom to increase its infrastructure, and in particular to design the integration of the new production unit in the USA.

Nutkao used the Colt public cloud in the Milan data center, and the virtual private network connection of the same telecommunications operator.

“We collaborated with Axians Sirecom to build the whole architecture, and we have the possibility to increase the calculation capacity or reduce it in just a few days on the cloud. In addition to the servers, all the user stations are also virtualised with Citrix,” said the CIO.
